Reconstructive and Aesthetic Surgeons, Inc.

Say goodbye to unwanted fat! Drs. Craig Colville and John Zavell now perform CoolSculpting, a non-invasive procedure that eliminates fat cells using a controlled cooling method. Follow the link below to view a video about this exciting new technology.

FREEZE YOUR FAT

Have you heard the news? Our physicians recently acquired a new Intense Pulse Light (IPL) machine, which is used to treat facial imperfections, such as hyperpigmentation and small veins. The pulsed light generates a lifting effect by naturally stimulating the production of collagen and improving skin tone and glow. Call 419.534.6551 for more information.

Join Dr. Colville and his staff on Thursday, February 9, for "Love Your Skin," a special event with savings and promotions for all attendees. Learn about the many services offered at both Bella Via and Reconstructive and Aesthetic Surgeons, Inc., meet with representatives from Allergan and SkinMedica, and view a live demonstration of CoolSculpting, a new service that eliminates fat without surgery. Call 419.534.6552 to RSVP.

Well, look no further! We have found a product that does just that. It absorbs into your skin, contracting skin cells and drawing them closer together. It targets areas that have lost elasticity, such as fine lines and wrinkles around the eyes, between the brows, and around the lips.

This safe and effective serum gives you a toned and lifted appearance in minutes, and lasts for up to eight hours, depending on your skin type. It is ideal for a special event or an evening out, and it really works!
